Claims 17-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 4.

Claims 22 and 24-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ouchi (4,436,087) in view of Ikeda et al. (5,911,694). Ouchi, in figure 2 for example, discloses first lumen (the lumen which houses endoscope 8) for housing an endoscope 8 therein, transparent tip 5, second lumen 2 eccentric the first lumen and having an open distal end 35 for housing a medical instrument 1 for performing procedures on tissue viewed through the transparent tip 5, and hood 7 extending from the distal end of the second lumen 2 and tapering down (proximally) towards the distal end of the first lumen, the hood maintaining its tapered configuration even in the absence of a medical instrument in the second lumen. Ouchi fails to disclose that the hood is flexible. However, Ikeda et al. teach that a hood 403 at the end of an endoscopic device should be elastic (col. 36, lines 46-48). This has the apparent advantage of preventing tissue damage when the hood contacts tissue as well as facilitating the removal of the hood from the endoscopic device. It would have been obvious to make the hood 7 of Ouchi elastic so that it too would have these advantages. With this

Art Unit: 3731

modification, the hood 7 would be flexible as claimed. Note that the transparent tip 5 of Ouchi is inherently capable of performing tissue dissection (as claimed) when forced against tissue layers, particularly when hood 7 is removed. As to claim 24, Ouchi discloses an additional lumen in figure 35. As to claim 30, the distal end of the hood extends substantially to the proximal edge of the transparent tip 5, particularly in figures 35 and 37.

Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's arguments with respect to claims 22 and 24-32 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS**

Art Unit: 3731

of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
